Project Guidelines and Progress Record

This handbook outlines the contents relevant to "Diploma Final Year Project", which is intended to be used by students and faculty members of the Department of Information Technology in

S.B.M.Polytechnic, Mumbai. This handbook is the result of an effort initiated to define the policy and improve the quality of the Final Year Project. It presents an efficient and object-oriented procedure for outcome-based assessment of CSE diploma engineering final year projects. The intention of this handbook is to develop a standardized framework for diploma engineers of Computer Engineering to show their project progress.

What is Final Year Project?

Final Year Projects represent the culmination of study towards the Diploma in Engineering. Projects offer the opportunity to apply and extend material learned throughout the program. Assessment is by means of a presentation, submission of a report, and a demonstration of work undertaken. In contrast to the majority of courses studied elsewhere in the program, projects are undertaken in small groups. This necessarily introduces the dimension of workload management into the program to enable completion of a large, relatively unstructured assignment over the course of the semester. The projects undertaken span a diverse range of topics and vary from year to year. The emphasis is necessarily on facilitating student learning in technical, project management and presentation spheres.

1. COURSE DETAILS

Programme: Computer Engineering	**Semester: V**
Course: #Project	**Group: INP**
Course Code: PRO230812	**Duration:16 Weeks**

Total IKS Hrs for the course :00

2. LEARNING AND ASSESSMENT SCHEME

Learning Scheme				Credits	Assessment Scheme								
Actual Contact Hrs./Week			Self-Learning (SL^) (Term Work + Assignment) (Hrs)		Paper Duration (Hrs.)	Theory (Marks)			Based on LL & TL			Based on Self Learning	Total Marks
									Practical (Marks)				
CL	TL	LL				FA-TH		Total		SA-PR		SLA (Marks)	
-	-	6	2	4	-	-				-		25	100

3. COURSE OBJECTIVE

To develop a project to give an in depth understanding of all the concepts learnt at the lower semesters. To expose students to the various stages of making a project and the capability to work in a team

4. SKILL COMPETENCY/INDUSTRY/EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences.

- **Design and develop Hardware and/or Software system**

5. COURSE OUTCOMES (COs): At the end of the semester student will be able to**: -**

CO No.	COURSE OUTCOME
CO1	Identify problem definitions that can be addressed by applying the acquired knowledge & skill

CO2	Plan the activities with timeline chart, work in groups/team and co-ordinate the work
CO3	Select design methodologies & its implementation.
CO4	Write the Project Report

6. CO-PO, CO- PSO MAPPING TABLE

Course and Code	Course Outcomes	Programme Outcomes.							Programme Specific Outcomes	
		PO1	PO2	PO3	PO4	PO5	PO6	PO7	PSO1	PSO2
#Project **PRO230812**	CO1	1	3	1	1	1	-	2	2	2
	CO2		2	3	2	1	1	2	1	1
	CO3		2	3	2	1	1	1	2	2
	CO4			2	2	1	1	1	1	1
	CO Avg.	1	2.33							

7. COURSE CONTENTS

A) Project synopsis

Abstract

Chapter 1. Problem statement

Chapter 2. System requirement specification

Chapter 3. Proposed system/solution

Chapter 4. Estimation and planning

Chapter 5. Future scope

Chapter 6. Conclusion

Bibliography and References

B) Project Report

The report shall be presented in following sequence:

Title sheet

Project Certificate

Project approval sheet

Acknowledgement

Abstract

Table of contents

List of tables (if desired)

List of Figures (if desired)

Chapter 1: Introduction (domain)

Chapter 2: Problem statement and proposed system (input /output statement, description, feasibility)

Chapter 3: Literature Review

Chapter 4: Design and Implementation (System Architecture, Requirement: hardware software any other , flow diagrams , activity diagrams, DFD , ER diagram if desired, User Interface)

Chapter 5: Result & Conclusions (Reports, future scope and limitation)

Bibliography and References

8. LIST OF PRACTICALS/ASSIGNMENTS/ TUTORIALS/DRAWINGS

i. In the preceding semester, the Head of Department notifies and briefs the students about project development, industry sponsored project, modification or value addition in previous project, project group formation, selection criteria and project scope. Students are asked to carry out the literature survey, review the latest technologies, look for emerging trends, list software platform available, refer previous project reports to prepare project proposals considering available time, cost, feasibility, environment, safety, standards, lab facility, ethics etc.

ii. At the beginning of the semester the project groups present their ideas in front of HOD and faculty members.

iii. Based on above criteria and relevance to contribution towards attainment of POs, the project topics are finalized group-wise and groups are allocated to faculties based on their area of expertise.

9. SUGGESTED MICRO PROJECT/ASSIGNMENT/ACTIVITES FOR SPECIFIC LEARNING / SKILL DEVELOPMENT (SELF LEARNING):

i. The students are asked to prepare and submit synopsis and detail implementation plan of 16 weeks to their respective guides.

ii. Interaction between students and project guide to discuss implementation methodology.

iii. The project guide monitors the progress of implementation on continuous basis.

iv. Final evaluation of project by examiners through presentation, demonstration and viva-voce.

10. IMPLEMENTATION STRATEGY (PLANNING)

1. Methodology to assess individual/collective contribution/understanding:

a. Internal evaluation (50 marks) by project guide.

Phase-I: 30% evaluation

At the end of first month, all the groups are asked to give presentation on progress made till date in front of committee consisting of HOD and project guides. The projects are evaluated based on project idea, knowledge, amount of work done, adherence to plan at every stage, motivation, interest shown, demonstration of skills (hardware, software, presentation), self-motivation, sincerity, punctuality, ethics etc. by the project guide and project evaluation committee.

Phase-II: 30% evaluation

The above activity is carried out at the end of second month. The students are guided for preparation of project reports.

Phase III: 40% evaluation

The above activity is carried out at the end of the semester along with demo and submission of project report.

The internal evaluation will be done on the basis of following criteria and weightage:

	Phase 1 (2-4 Week)	**Phase 2 (6- 8 Weeks)**	**Phase 3 (14-16 Week)**	**Total**
Marks	15	15	20	50
Evaluation Criteria	1. Project idea 2. Presentation	1. Progress made in the project 2. Presentation	1. Progress made in implementation 2 Presentation	

The student/ group will maintain the weekly report to monitor the progress of the project.

b. External evaluation (50 marks) by expert from industry/institute (external examiner)

The students demonstrate the prototype/ working projects and give power point presentation in front of

External examiner. Internal and external examiners evaluate the student on the following aspects:

a. Understanding and completeness of the Project
b. Approach to the solution of problem
c. Planning and implementation
d. Design and testing procedure
e. Project Report
f. Students' involvement in the Project

PROJECT DETAILS

Title: SentinelX: Autonomous Digital Public Safety & Antifraud Architecture_____

Domain: Cyber Security_____

Name of Guide: Mrs. Prachi Arora_____

Problem Definition: The rapid growth of cyber fraud, digital scams, financial crimes, identity theft and online threats creates significant challenges for public safety and financial security. Existing systems often rely on fragmented monitoring and delayed responses, making early threat detection difficult. SentinelX proposes an intelligent, real-time platform to analyze multiple security signals, assess risk, generate alerts and support faster.

Appendix-A Project Report Formatting Guidelines

A-1 Paper:

The report shall be printed on white bond paper, whiteness 95% or above, weight 70 gram or more per square meter. The size of the paper shall be standard A4; height 297 mm, width 210 mm.

A-2 Type Setting, Text Processing and Printing:

The text shall be printed on single side of a page employing laser jet or Inkjet printer, the text having been processed using a standard text processor. The standard font shall be "Times New Roman of 12 pts with 1.5 line spacing".

Page Format: The Printed Sheets shall have the following written area and margins:

Top Margin	:	15 mm
Left Margin	:	30 mm
Right Margin	:	20 mm
Bottom Margin	:	22 mm
Head Height	:	3 mm
Head Separation	:	12 mm
Footer	:	3 mm
Foot Separation	:	10 mm
Text Height	:	245 mm
Text Width	:	160 mm

When header is not used the top margin shall be 30 mm.

Pagination:

Page numbering in the text of the report shall be Hindu numerals at the center of the footer. Page number "1" for the first page of the chapter shall not appear in print; only the second page will bear the number "2". The subsequent chapters shall begin on a fresh page. Pagination for pages before the Introduction chapter shall be in lower case Roman numerals, e.g., "iv".

Header:

When the header style is chosen, the header can have the Chapter number and Section number (e.g., Chapter 2, Section 3) on even numbered page headers and Chapter title or Section title on the odd numbered page header.

Paragraph format:

Vertical space between paragraphs shall be about 2.5 line spacing. The first line of each paragraph should normally be indented by five characters or 12mm. A candidate may, however, choose not to indent if she/he has provided sufficient paragraph separation. A paragraph should normally comprise more than one line. A single line of a paragraph shall not be left at the top or bottom of a page. The word at the right end of the first line of a page or paragraph should, as far as possible, not be hyphenated.

A-3 Chapter and Section Format:

Chapter:

Each chapter shall begin on a fresh page with an additional top margin of about 75mm.

Chapter number and title shall be printed at the center of the line in 6mm font size 18pt in bold face using both upper and lower case all capitals or small capitals shall not be used. A vertical gap of about 12 mm spacing after font size 36 with single line spacing shall be left between the Chapter number and Chapter title lines and between chapter title line and the first paragraph.

Sections and Subsections:

A chapter can be divided into Sections, Subsections and Sub-sub Sections so as to present different concepts separately. Sections and subsections can be numbered using decimal points, e.g. 2.2 for the second section in Chapter 2 and 2.3.4 for the fourth Subsection in third Section of Chapter 2. Chapters, Sections and Subsections shall be included in the contents with page numbers flushed to the right. Further subsections need not be numbered or included in the contents. The Section and section titles along with their numbers in 5 and 4mm (16 and 14 pt) fonts, respectively, in bold face shall be flushed to the left (not centered) with 15 mm space above and below these lines. In further subdivisions character size of 3 and 3.5 with bold face, small caps, all caps and italics may be used for the titles flushed left or centered. These shall not feature in the contents.

Table / Figure Format:

Tables and figures should be presented in portrait style as far as possible. Small size table and figures (less than half of writing area of a page) should be incorporated within the text, while larger ones may be presented on separate pages. Table and figures shall be numbered chapter wise. For example, the fourth figure in chapter 5 will bear the number Figure 5.4 or Fig 5.4. Table number and title will be placed above the table while the figure number and caption will be located below the figure. Reference for Table and Figures reproduced from elsewhere shall be cited in the last and separate line in the table and figure caption.

Appendix-B Contents of Synopsis Report

Title Sheet (Specimen A)

Abstract

The 500-word abstract shall highlight the important features of the project report. The Abstract in the report, however, shall have two more parts, namely, the layout of the thesis giving a brief chapter wise description of the work and the key words.

Contents, List of Figures and Tables:

The contents shall follow the Abstract and shall enlist the titles of the chapters, section and sub section using decimal notation, as in the text, with corresponding page number against them, flushed to the right. Two separate lists of Figure captions and Table titles along with their numbers and corresponding page numbers against them shall follow the Contents.

Abbreviation Notation and Nomenclature:

A complete and comprehensive list of all abbreviations, notations and nomenclature including Greek alphabets with subscripts and superscripts shall be provided after the list of tables and figures. (As far as possible, generally accepted symbols and notation should be used). Auxiliary page from dedication (if any) to abbreviations shall be numbered using Roman numerals in lower case, while the text starting from the Introduction shall be in Hindu Arabic. (The first pages in the both the cases shall not bear a page number).

Chapter 1: Introduction

It shall justify and highlight the problem posed, define the topic and explain the aim and scope of the work presented in the report. It may also highlight the significant contributions from the investigation.

Chapter 2: Review of Literature

It shall present a critical appraisal of the previous work published in the literature pertaining of the topic of the investigation.

Chapter 3: Report on Present Investigation

The reporting on the investigation shall be presented in one or more chapters with appropriate chapter titles. Due importance shall be given to experimental setups, procedures adopted, techniques developed, methodologies developed and adopted. While important derivations/formulae should normally be presented in the text of these chapters, extensive and long treatments, copious details and tedious information, detailed results in tabular and graphical forms may be presented in Appendices. Representative data in table and figures may, however, be included in appropriate chapters. Figures and tables should be presented immediately following their first mention in the text. Short tables and figures (say, less than half the writing area of the page) should be presented within the text, while large table and figures may be presented on separate pages. Equations should form separate lines with appropriate paragraph separation above and below the equation line, with equation numbers flushed to the right.

Chapter 4: Conclusion

This will be the final chapter of the report. A brief report of the work carried out shall form the first part of the Chapter. Conclusions derived from the logical analysis presented in the Results and Discussions Chapter shall be presented and clearly enumerated, each point stated separately. Scope for future work should be stated lucidly in the last part of the chapter.

Appendix

Detailed information, lengthy derivations, raw experimental observations etc. are to be presented in the separate appendices, which shall be numbered in Roman Capitals (e.g. "Appendix I"). Since reference can be drawn to published/unpublished literature in the appendices these should precede the "Literature Cited" section.

Literature Cited/ references

This should follow the Appendices, if any, otherwise the Conclusions chapter. The candidates shall follow the style of citation and style of listing in one of the standard journals in the subject area consistently throughout his/her report, for example,

IEEE in the Department of Electrical Engineering, ASME in Department of Mechanical Engineering. However, the names of all the authors along with their initials and the full title of the article/monogram/book etc. have to be given in addition to the journals/publishers, volume, number, pages(s) and year of publication. Citation from websites should include the names(s) of author(s) (including the initials), full title of the article, website reference and when last accessed. Reference to personal communications, similarly, shall include the author, title of the communication (if any) and date of receipt. Articles, technical notes etc. on the topic of the report published by the candidate may be separately listed after the literature cited. This may also be included in the contents. The candidates may also include reprints of his/her publications after the literature citation.

Acknowledgements

The acknowledgments by the candidate shall follow the citation of literature, signed by him /her, with date.

Appendix-C Contents of Project Report

Contents of the Project Report will be same as that of the Synopsis Report with few additions as follows and few chapters added before Conclusion chapter.

Title Sheet (Specimen A)

Certificate (Specimen B)

Approval sheet (Specimen C)

Letter of Sponsorship (If sponsored project)

Vision and Mission of Institute and Department

PROGRAMME OUTCOMES (POs)

1. **Basic and Discipline specific knowledge:** Apply knowledge of basic mathematics, science and engineering fundamentals and engineering specialization to solve the engineering problems.
2. **Problem analysis:** Identify and analyse well-defined engineering problems using codified standard methods.
3. **Design/ development of solutions:** Design solutions for well-defined technical problems and assist with the design of systems components or processes to meet specified needs.
4. **Engineering Tools, Experimentation and Testing:** Apply modern engineering tools and appropriate technique to conduct standard tests and measurements.
5. **Engineering practices for society, sustainability and environment:** Apply appropriate technology in context of society, sustainability, environment and ethical practices.
6. **Project Management:** Use engineering management principles individually, as a team member or a leader to manage projects and effectively communicate about well-defined engineering activities.
7. **Life-long learning:** Ability to analyse individual needs and engage in updating in the context of technological changes

PROGRAMME SPECIFIC OUTCOMES (PSOs)

PSO1: Demonstrate the fundamental knowledge in the areas of Operating system, Web Technology, Microprocessor based system and IOT by applying programming skills and developing applications.

PSO2: Administer and manage Open source, Networking, Security and Database domains to enhance student growth.

COMPUTER ENGINEERING DEPARTMENT

Vision

Create a sustainable academic environment to produce highly competent computer professionals of the future

Mission

M1. To expose students to latest tools and technologies in computing.
M2. To foster the professional development of students by providing excellence in education.
M3. To Adapt rapid advancements in computing by engaging students in the lifelong learning.
M4. To inculcate sound ethical,moral and social values amongst students for benefit of the society.

Program Educational Objectives

The program educational objectives (PEOs) are to produce Computer professionals.

PEO1. Identify, design and solve computing problems by applying knowledge in Computer engineering.
PEO2. Promote lifelong learning by integrating academic knowledge and practical applications.
PEO3. Depict effective team work and practical skills for holistic development.
